DESCRIPTIVE MEMORY

High concentration detergent formulated for hard water "15-30°dH = 25-60° fH". Effective even on the most resistant residues, such as tannins, coffee residues, etc. Preserves machines and washed parts in perfect condition. Its low dosage allows the washing process to be optimised to the maximum together with our automatic equipment. Its composition contains corrosion inhibitors and agents that prevent the formation of calcareous deposits in the machines.

HOW TO USE

Depending on the dirt to be removed, its dosage will vary between 3 and 5 gr of product per litre of water supplied. In order to obtain maximum efficiency in the washing process, a working temperature of 60°C is recommended.
